Press Release

Aliand Enterprises to Develop Defense and Homeland Security Partners for ai-one

La Jolla CA | Zurich | Berlin February 22, 2011 - ai-one inc., a provider of software development technology (SDK) for semantic associative search and the development of learning machines has signed Peter Leed and his firm Aliand Enterprises as domain expert for business development and partnerships in the government and border security markets.

According to Leed, “the inherent ability of the ai-one to find patterns and associations across disparate sources of documents in many languages could form the basis of a new generation of security applications. I’m looking forward to developing some new partners for ai-on in this field.”

[Peter Leed](#), CEO is an expert in GIS based software tools for security, has a Top Secret clearance and many years of experience in government applications with primary contractors such as Boeing and Lockheed Martin. He is currently trained on the current policies and procedures for DOD 5000.2 Agile Acquisition, has Joint Forces DoD, C4I and Intelligence Operations project and design experience

About Aliand Enterprises, based in Norfolk Massachusetts provides program management, professional engineering, systems design and test and evaluation services for physical and operational security to industry, government and military clients. Aliand is dedicated to sourcing leading edge technology for boundary security planning solutions to clients worldwide.

About ai-one inc., ai-one provides an “API for building learning machines”. Based in San Diego, Zurich and Berlin, ai-one’s software technology is an adaptive holosemantic data space with semiotic capabilities (“biologically inspired intelligence”). The Topic-Mapper™ SDK for text enables developers to create intelligent applications that deliver better sense-making capabilities for semantic discovery, lightweight ontologies, knowledge collaboration, sentiment analysis, artificial intelligence and data mining. www.ai-one.com
