Press Release

ai-one Signs Experienced JEE and Enterprise Programming Shop JOYTECH GmbH to Accelerate Deployments

La Jolla CA | Zurich | Berlin February 21, 2011 - ai-one inc., a provider of software development technology (SDK) for semantic associative search and the development of learning machines has signed Rolf Schenk and his firm JOYTECH GmbH to add veteran enterprise programming expertise to its consulting network.

"I am excited about applying the ai-one AI engine to a number of my client financial systems projects and have several of my own proprietary ideas in development for the Topic-Mapper API" says Rolf Schenk.

Schenk, CEO, is a Senior Internet JEE architect, developer, and web application security expert with experience as a business analyst, project manager and application integrator. He has been the senior technical team lead for onshore and offshore teams (CH, HK, India) and has a banking education. Schenk is frequently retained to serve as the communication bridge between business and technical teams. After more than 10 years as a Senior Java Developer, Architect, and Project Manager, he is considered a creative visionary in the field of social semantic web focused on applying advanced computing technologies to this field

About JOYTECH GmbH, Founded by [Rolf Schenk](#) in 2002, it provides IT, financial services and non-profit clients JEE integration with expert knowledge in large scale straight through processing and eBanking. JOYTECH GmbH operates with a well-established network of professionals and is a guarantor for effective execution of your software projects and products covering all the software value chain from requirement modeling to scalable and maintainable software.

About ai-one inc., ai-one provides an "API for building learning machines". Based in San Diego, Zurich and Berlin, ai-one's software technology is an adaptive holosemantic data space with semiotic capabilities ("biologically inspired intelligence"). The Topic-Mapper™ SDK for text enables developers to create intelligent applications that deliver better sense-making capabilities for semantic discovery, lightweight ontologies, knowledge collaboration, sentiment analysis, artificial intelligence and data mining. www.ai-one.com
