Press Release

Brainfood partners to introduce ai-one technology to clients

La Jolla CA | Zurich | Berlin March 14, 2011 - ai-one inc., a provider of software development technology (SDK) for semantic associative search and the development of learning machines has signed June von Bonin and Brainfood to its Consulting Partner program.

“June von Bonin writes about the brain, intelligence in general and artificial intelligence in our ai-one blog. Her strengths lie in explaining, visualizing and reducing the complexity of technical and complex information and new technology to suit specific target groups”, says Walt Diggelmann, CEO of ai-one.

About Brainfood, based in Zurich, Brainfood provides scientific and technical writing and researches new technology for clients. Brainfood was founded by June von Bonin who specializes in advising enterprises, organizations and individuals (<http://www.brainfood.bz>). Von Bonin, CEO has worked in renowned financial institutions and contributed to the trade magazine Electrosuisse Bulletin. Brainfood also writes the ai-one blog.

About ai-one inc., ai-one provides an “API for building learning machines”. Based in San Diego, Zurich and Berlin, ai-one’s software technology is an adaptive holosemantic data space with semiotic capabilities (“biologically inspired intelligence”). The Topic-Mapper™ SDK for text enables developers to create intelligent applications that deliver better sense-making capabilities for semantic discovery, lightweight ontologies, knowledge collaboration, sentiment analysis, artificial intelligence and data mining.
